Basic Table Specifications

You can adjust the table top height within the range from 25 5/8" to 49 1/4".

*With a safety reverse function that moves the desk approximately 1inch backward (approximately 1 1/8" when the desk is moved slowly) immediately when the desk hits an obstacle as standard
 *Rated voltage: 100V, rated frequency: 50/60Hz
 *Rated power consumption: free standing type: 300W L-shaped type: 450W bench type: 600W

When laying out tables, be sure to leave the amount of space indicated below between them to ensure safety.

Free standing type
Bench type

L-shaped type

Customizable Type

■ Control panel

You can choose between three different types: the "button type (with the indicator)" including a height display and a memory function which allows you to save your preferred height, the simpler "button type (without the indicator)" which only includes a lifting and lowering button, and the "lever type" which allows you to lift or lower the desk more intuitively.

■ Table top edge

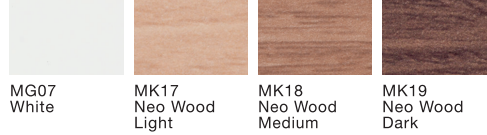

A sloped edge with a smooth, round surface that remains comfortable even if you lean on it with your arms. You can also select a more linear and sharper knife edge.

Electrical Diagram

- Utilizes 8-wire, 4-circuit electrical module system as power source for each outlet in wiring duct.
- For every power infeed of 4-circuit electrical module system a 3 + 1 configuration is available as standard.
- All electrical module systems need to be installed in field with the back-to-back height adjustable table by furniture installer.
- 20-amp hardwire power infeed only. A licensed electrician is required to complete hardwire connections to building's power source.
- Hardwire power infeed is having 3 length(72"/120"/240") as standard. Other length hardwire power infeed is available as an option.
- Hardwire power infeed is flexible metal conduit as standard. Liquid-tight conduit option available.
- Neutral(White) wires are 10 gauge, hot and ground wires are 12 gauge
- When specify, receptacles must be specified separately.
- Power source cables and desktop power outlets are UL listed for upholding strict safety standards.

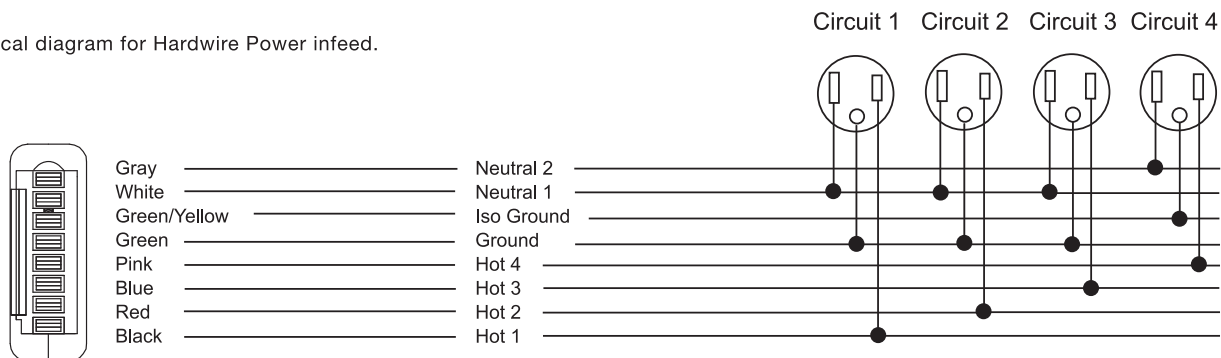

Chicago Electrical Requirements

The city of Chicago may require hardwiring of electrical components. For Chicago applications, please contact your local representatives or dealerships.

Other Municipality Electrical Requirements

Other metropolitan areas besides Chicago may have special electrical requirements as well. Consult a local electrical contractor for proper code compliance information.

Basic Table Specifications

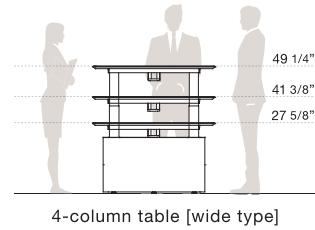

2-column table

The tabletop height of the meeting table can be adjusted within the range from 27 5/8" to 49 1/4".

*With a safety reverse function that moves the desk approximately 1inch backward (approximately 1 1/8" when the desk is moved slowly) immediately when the desk hits an obstacle as standard
*Rated voltage 100 V, rated frequency 50/60Hz
*Rated power consumption: 300W

Basic Table Specifications (wide type)

4-column table [wide type]

The tabletop height of the meeting table (wide type) can be adjusted within the range from 27 5/8" to 49 1/4".

*With a safety reverse function that moves the desk approximately 1inch backward (approximately 1 1/8" when the desk is moved slowly) immediately when the desk hits an obstacle as standard
*Rated voltage 100 V, rated frequency 50/60 Hz
*Rated power consumption: 600W

Control panel

Button type (with indicator)

Button type (without indicator)

Lever type (without indicator)

You can choose between three different types: the "button type (with the indicator)" including a height display and a memory function which allows you to save your preferred height, the simpler "button type (without the indicator)" which only includes a lifting and lowering button, and the "lever type" which allows you to lift or lower the desk more intuitively.

Four tabletop colors

The entire circumference is equally curved. The molded resin structure gives the surface a soft feel.

Cable opening

The cable cover can be opened and closed. A spacious opening allows you to store power strips and similar equipment inside. When not using the cable duct, use the cover to close it completely.
