Integrated Technology

Phlox table offers two choices of power supply. An in-surface port embedded on the tabletop is visible and easily accessible, while under-mounted power is concealed beneath the surface, keeping the tabletop clean and flat. Mesh wire management trays can be attached under the tabletop to neatly house power units and loose cables. Matching vertical wiring ducts can be paired with the trays to keep cable management tidy.

Power unit

In-surface power unit

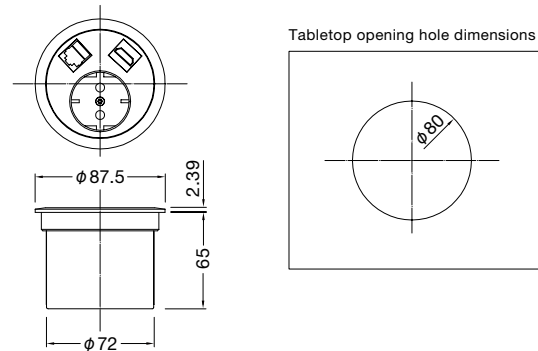

The in-surface power unit is embedded neatly on the tabletop and yet it offers the required power and data function for a meeting area. The in-surface power unit is installed on site and the table with cutouts need to be specified. Addition to the basic power port, USB charging ports and data ports such as HDMI and RJ45 are available as an option.

Dimensions

(900 square/round only)

Dimensions

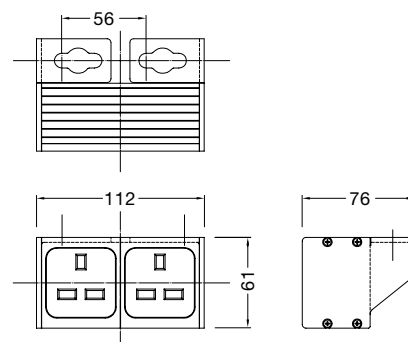

Under-mount power unit

The under-mount power unit is concealed beneath the worksurface keeping the tabletop clean and flat. The under-mount power unit is installed on site and the table without cutouts has the pre-drilled holes to allow the easy installation.
