

Abilis

okamura

Nature Knows Best

Inspired by the fluid curves and balance of the natural world.

Said to be nature's most efficient shape, the hexagon ensures maximum strength from minimal materials.

Using a hexagonal framework, Abilis realizes highly efficient use of materials, coupled with well-balanced strength.

The interplay between the two hexagonal loop frames creates an organic design that echoes the effortless ingenuity of nature.

Featuring all the function required of a modern performance chair, Abilis ensures comfort and robust support for all users.

OKAMURA ×
ITO® DESIGN

Abilis is designed in collaboration with ITO Design — a German design firm that has produced a variety of furniture designs and received numerous awards. Abilis takes a progressive approach to defining the character of a modern office chair. By seamlessly merging the lower back and armrests into one cohesive structure, an open loop shape is created that visually frames the seat. This way of integrating shapes gives Abilis its distinctive, dynamic and forward-looking design.

SUSTAINABILITY

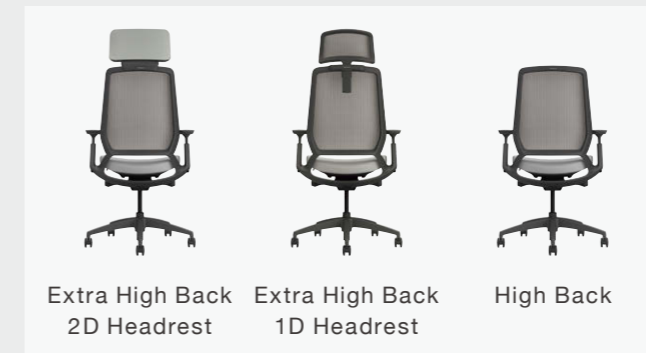

A simple structure reduces the number of component parts, making it easier to sort and disassemble them into different materials.

This in turn helps to promote the re-use of components as raw materials, and in so doing reduces environmental impact.
