

# Rin

**okamura**

## Rin, the dignified beauty of being.

An ergonomic mesh chair named after the Japanese word *rin* which translates to 'a dignified state of being'.

Designed based on Okamura's own research into ergonomics, Rin is a chair that provides a comfortable seating experience and helps maintain ideal posture.

# Functions

Synchro reclining mechanism

The backrest and seat recline in sync with each other, taking the pressure off your thighs and increasing comfort.

The reclining tension can be adjusted to suit your body. The backrest has a reclining range of 22° and can be locked in a pre-set position.

Seat height is adjustable by 100mm.

The slide-seat type can be adjusted the depth of the seat in the range of 50mm by the lever under the seat.

1D and 3D adjustable arms easily adjust up and down. 3D adjustable arms also twist inward and outward, slide forward and backward.

The supple lumbar support reinforces healthy posture and supports your body's core.

The backrest is shaped to provide a simple hidden handle to help move the chair.
